Summary

Dynamic and growth-oriented software engineer with a strong passion for innovation and problem-solving. Committed to leveraging technical expertise and a continuous learning mindset to drive impactful solutions and contribute to HCL's mission of advancing technology and delivering transformative digital experiences.

Education

Babu Banarasi Das Institute of Technology and Management — **October 2022 - Present**
Computer Science and Engineering — B.Tech
Current CGPA : 8.05

Bal Vidya Mandir Senior Secondary School — **April 2019 - July 2021**
93.5 % — Senior Secondary Education

National Institute of Open Schooling — **May 2018 - May 2019**
80 % — Secondary Education

Projects

PDF Populator
A Python Flask application that automates repetitive PDF tasks by merging overlay data onto template PDFs using the PyPDF module. It generates documents like receipts efficiently while tracking history in MongoDB Atlas. Users can view past entries and automatically repopulate fields by selecting any previous record, streamlining document generation for non-technical users.

AGCA Global
A Next.js-based platform presenting CA services with a modern and minimalistic design. The blogs feature is implemented using a Strapi backend, utilizing Incremental Static Regeneration (ISR) every 15 minutes to ensure up-to-date content.

WeTrix
A browser extension which automatically detects the website a user is visiting and displays relevant tips, tricks, and shortcuts for that platform. The backend, hosted on an AWS EC2 instance, fetches JSON data from the GitHub API every 30 minutes.

Pixel Adventure Game
A retro-themed platformer game developed in Unity, featuring classic pixel art aesthetics. Game mechanics, including character movement, collisions, and interactions, are implemented using C#, providing a responsive and engaging gameplay experience reminiscent of vintage platformers.
